SUMMARY

Software Engineer with experience building scalable web applications solving real world business problems. Skilled in secure APIs, real time systems and business logic implementation. Focuses on clean, production ready code with testing.

SKILLS

Front End: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Redux Toolkit, React Router.

Back End: C#, Python, Java, .NET, Node.js, Express, MongoDB, PostgreSQL, Redis.

Tools: Linux, Git, Github, Docker, CI/CD, Claude, Testing.

Soft Skills: Communication Skills, Problem Solving.

EXPERIENCE

Junior Software Engineer at Wolke Consultancy - Full Time

Dec 2025 – Present

- Promoted to Junior Software Engineer within **2 months** of internship, recognized for resolving **15+ critical bugs** (90% fix accuracy), delivering all tasks ahead of schedule, and translating **10+ customer pain points** into implemented features across **LMS, CRM, and SAAS platforms**.
- Developed and maintained full stack applications using **MERN** and **PERN** stacks for **LMS, CRM, and SaaS** products; implemented business logic that improved process efficiency by **30%** and maintained **95%** code quality through rigorous testing and **5+ iterative feedback cycles** per feature.
- Collaborated with a team of **4 engineers** to resolve **10+ complex technical issues** across multiple SaaS environments, reducing average resolution time by **25%** and achieving **100% on time delivery** for sprint milestones, including CRM and LMS modules.
- Designed and deployed **AI powered automation** that streamlined internal workflows, reducing manual effort by **35%** and achieved **95% accuracy** in automated task processing.

PROJECTS

ZENO - Finance Tracker

- Built a **Full Stack Finance App** with React, Redux Toolkit, Node.js, Express, and PostgreSQL, enabling users to manage income, expenses, savings, budgets, and accounts via an interactive dashboard.
- Implemented **secure authentication** using JWT (HTTP-only cookies), **OTP email verification** with SendGrid, and automated reminder notifications for improved user security and engagement.
- Designed a **scalable REST API** with Sequelize ORM and deployed the system using **Vercel (frontend), Render (backend), and Neon (database)** to ensure high availability and production reliability.

PINGNET - Messenger

- Developed a **Full Stack real-time messaging** platform using **React, Redux Toolkit, Tailwind CSS, Shadcn UI, Node.js, Express, MongoDB, and Socket.IO**, enabling seamless communication in a modern and responsive interface.
- Implemented **secure user authentication** with JWT (HTTP-only cookies) and **OTP based email verification**, along with robust friend management features for adding and removing contacts.
- Built real time messaging with support for text and images, ensuring low latency delivery through optimized **Socket.IO** event handling and scalable backend architecture.

EDUCATION

Iqra University - CGPA: 3.7
Bachelors in Computer Science

Mar 2023 - Present
